Monday

Beginning Robotics (Grades 1 to 3)...Fee \$275

Using the LEGO® EV3 Mindstorms systems, weekly challenges teach new designing, building, and programming skills that incorporate new elements like motors and sensors. Class maximum is 12 students. A second session is being offered on Thursdays

iCAMP's: Code and Create an App (Grades 4 to 6)...Fee\$300

With the power of coding, anything is possible! That's the primary lesson of iCAMP's Code and Create an App course, which uses age-appropriate platforms and interactive challenges to introduce coding concepts like loops, conditionals, cause and effect, and much more.

Throughout the course, young coders will use these concepts to build their own video games, quizzes, and apps. Students will collaborate with their peers to test and revise these apps and their interfaces, learning how to use constructive feedback along the way. With Blocksmith, a 3D content creation tool, students will learn the basics of modern game and app design – creating their own power-ups, levels, challenges, and scenes to share and compare with their peers.

Tennis (Grades K to 2)...Fee\$300

TGA makes it convenient and fun for your child to learn and play tennis right on their school campus! Our proprietary curriculums for elementary school and middle school were created by TGA's education experts and the United States Tennis Association (USTA). Students will experience a mix of tennis instruction, rules & etiquette lessons, educational components, character development lessons and physical activity as they advance through the five-level program. Our screened and certified instructors have a passion for working with children and are trained to help your student athlete develop a strong foundation of skills and knowledge as well as a passion for the sport. TGA provides all equipment.

Tuesday

CYO Chess (Grades 1 to 8)...Fee \$250

Learn the fundamentals of chess. Increase your analytical and critical thinking skills.

Space Exploration: What's Out There? (Grades PreK & K)...Fee \$275

From Ancient Greece to Galileo to walking on the moon, early learners will be introduced to astronomy and the earliest days of space exploration. Hands-on projects and role-play help junior explorers find connections to the universe. Class maximum is 12 students.

Wednesday

Beginning Robotics (Grades 1 to 3) *2nd Session Offered*...Fee \$275

Using the LEGO® EV3 Mindstorms systems, weekly challenges teach new designing, building, and programming skills that incorporate new elements like motors and sensors.

iCAMP's: Mad Scientists: Slime, and Goop, and Machines, oh my! (Grades 3 to5)...Fee \$300

Welcome to the world of weird science! In this course, budding inventors and fledgling mad scientists can experiment to their heart's content, creating their own slime recipes and learning about the chemistry of polymers to gain a better understanding of how it all works. Later, they'll extract DNA from peas and learn how to engineer and design their own cars – all relating back to their everyday lives and showcasing the power of the scientific method. By the time this course is done, students will take ownership of their science education and walk away excited about the possibilities the natural world has to offer.

Game On! Code and Create with Hatch XR's Video Game Design (Grades 6 to 8)...Fee \$300

Get ready to level up your coding skills and dive into the exciting world of video game design with Hatch XR software! In our immersive course, coding beginners will embark on an epic journey of creativity and coding to bring their game ideas to life. Students will unlock the secrets of game development, starting with complex block-based coding and advancing to the realm of JavaScript. With Hatch XR's intuitive interface and guidance from our instructors, students will master the art of coding characters, crafting immersive environments, and adding captivating sound effects and animations.

Students will experience the thrill of creating their own playable games, from brainstorming innovative ideas to coding and testing their creations. Their imagination is the only limit as they design engaging and interactive gaming experiences.

Thursday

Digital Design (Grades 4 & 5)...Fee\$280

Weekly digital design and animation projects bring out individual creativity while learning new tech skills across multiple software platforms. Class maximum is 12 students. A second session is being offered on Fridays

Paint Your Own Pottery: Story Time (Grades K to 2)...Fee \$280

In this "paint a story" class, an instructor will read a book and students will paint a pottery project based on the topic of the book! One new project per student each week, with beautiful fired pieces returned in 1-2 weeks. Class hosted by MADE: my art + design experience.

Friday

Digital Design (Grades 4 & 5) *2nd Session Offered*...Fee \$300

Weekly digital design and animation projects bring out individual creativity while learning new tech skills across multiple software platforms.

Tennis (Grades 3 to 5)...Fee \$300

TGA makes it convenient and fun for your child to learn and play tennis right on their school campus! Our proprietary curriculums for elementary school and middle school were created by TGA's education experts and the United States Tennis Association (USTA). Students will experience a mix of tennis instruction, rules & etiquette lessons, educational components, character development lessons and physical activity as they advance through the five-level program. Our screened and certified instructors have a passion for working with children and are trained to help your student athlete develop a strong foundation of skills and knowledge as well as a passion for the sport. TGA provides all equipment.

Little Ecologist Course (Grades K to 2)- 3:00-4:00 pm...Fee-\$250

Little Ecologists is an English and French immersion program designed around the cycle of nature with the 4 seasons and the colors of the Rainbow. Each week we choose a color, a topic, a book, and we link it with ecological subjects such as global warming or waste reduction, biodiversity and the 3 R's: reduce, reuse, and recycle to raise children's environmental awareness. We offer fun and playful activities such as French story time, Arts and crafts, and interactive games around the theme of the Earth. Class maximum is 12 students.
